BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER as at and for the year ended 31 December 2025

II. BASIS OF PREPARATION

1 Accounting standards and system

The Company has been applying the Vietnamese Accounting System issued in accordance with the Circular No, 200/2014/TT-BTC dated 22 December 2014 of the Finance Minister and the Circulars giving guidance on the implementation of accounting standards and system of the Ministry of Finance.

The dependent units form their own accounting apparatus and dependent accounting apparatus. The consolidated financial statements of the whole Company are prepared on the basis of a combination of the financial statements of its dependent units. Revenue and balances between affiliates are eliminated when preparing the Consolidated Financial Statements

2 Applied accounting documentation system

The Company's applied accounting documentation system is the General Journal system.

3 Fiscal year

The Group's fiscal year applicable for the preparation of its consolidated financial statements starts on 1 January and ends on 31 December.

4 Accounting currency

The consolidated financial statements are prepared in VND.

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1 Basis of preparing consolidated financial statements

Consolidated financial statements are prepared on the basis of accrual accounting (excluding information related to cash flows).

The consolidated financial statements include the financial statements of BAF Vietnam Agriculture Joint Stock Company (parent company) and its subsidiary. Subsidiary is an entity controlled by the parent company. Control exists when the parent company has the ability to directly or indirectly dominate the financial and operating policies of the subsidiary in order to derive economic benefits from these activities. In assessing control, the financial statements does take into account potential voting rights currently in effect or to be converted.

The income statements of subsidiaries to be acquired or sold during the year are presented in the Consolidated Income Statement from the date of purchase or until the date of the sale of the investment in that subsidiary.

In the event that the accounting policy of the subsidiary is different from the accounting policy that the Company uniformly applied, the financial statements of the subsidiary will be adjusted accordingly before being used for reporting the consolidated financial statements.

Balance of balance sheet items between the Parent Company and its subsidiaries, internal transactions, unrealized internal interest arising from these transactions are excluded when preparing the consolidated financial statements. Unrealized losses resulting from internal transactions are also eliminated unless the cost of making the loss cannot be recovered.

Minority interests represent the share of profits and net assets of the subsidiary not held by the shareholders of the parent company and are presented in a separate section on the Consolidated Income Statement and Consolidated balance sheet. Minority interests include the value of minority interests at the initial business combination and the minority interest in equity fluctuations since the date of the combination. joint. Losses corresponding to minority shareholders' equity in excess of their equity in the equity of the subsidiary are counted as decreases toward the profit of the Parent Company unless the minority shareholder is obligated to offset that loss.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025**

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2 Business Acquisitions

Business acquisition is accounted by the purchase method. The cost of a business acquisition includes the fair value at the exchange date of exchanged assets, incurred or acknowledged liabilities and equity instruments issued by the Parent Company for exchange, in exchange for control of the acquiree plus costs directly attributable to the acquisitions. Acquired assets, identifiable liabilities and contingent liabilities incurred in a business combination are recognized at fair values at the date of business acquisition.

Difference between the cost of the business acquisition and the buyer's ownership of the Company in the net fair value of identifiable assets, liabilities and recognized contingent liabilities of the acquiree at Buying date is recognized as goodwill. If the cost of a business acquisition is less than the net fair value of the acquiree's net identifiable assets, identifiable liabilities and recognized contingent liabilities, the difference is recognized in the income statement during the year the purchase occurred.

3 Goodwill

Goodwill in the consolidated financial statements is the excess of the cost of a business combination over the interest of the Company over the fair value of the assets, liabilities and contingent liabilities of the subsidiaries at the date of the investment operation. Goodwill is considered an intangible asset, amortized on a straight-line basis over the estimated useful life of that goodwill for a period of 10 years (regarding the investments in subsidiaries).

4 Foreign currency transactions

Actual exchange rate for transactions in foreign currencies incurred in the year:

- The actual exchange rate when buying and selling in foreign currencies is the rate specified in the foreign currency purchase and sale contract between the Company and a commercial bank;
- The rate of contributing capital or receiving capital contribution is the foreign currency buying rate of the bank where the Company opens an account to receive capital from investors on the date of capital contribution;
- The rate when recognizing receivables is the buying rate of the commercial bank where the Company appoints customers to pay at the time the transaction arises;
- The rate when recognizing liabilities is the selling rate of the commercial bank where the Company intends to make the transaction at the time the transaction arises;

Actual exchange rate upon revaluation of monetary items denominated in foreign currencies at the time of preparing the financial statements:

- For items classified as assets, the applied rate is the buying rate in foreign currency;
- For foreign currency deposits, the applied rate is the purchase rate of the bank where the Company opens foreign currency accounts;
- For items classified as liabilities, the applied rate is the selling exchange rate of foreign currency of the commercial bank where the Company regularly has transactions.

All real exchange rate differences arising in the period and differences resulting from revaluation of monetary items denominated in foreign currencies at the end of the period are accounted to the income statement of the accounting period.

5 Cash and cash equivalents

Cash includes cash at the fund, demand deposits in bank, monetary gold used with value storage functions, excluding gold classified as inventory used for the purpose of raw materials, materials to manufacture products or goods for sale.

Cash equivalents are short-term investments with a maturity or redemption period of no more than three months from the date of purchase, that are readily convertible to a known amount of cash and carry an insignificant risk of changes in value.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

6 Financial investment

Held-to-maturity investments

An investment is classified as held-to-maturity when the Company has the intention and ability to hold to maturity. Held-to-maturity investments include: bank deposits with term (including treasury bills, promissory notes), bonds, and preference shares that the issuer is required to buy back, and loans held to maturity for the purpose of earning periodical interests and other held-to-maturity investments.

Held-to-maturity investments are initially recognized at historical cost including the purchase price and transaction costs of the investments. After initial receipt, these investments are recorded at recoverable value. Interest income from held-to-maturity investments after the acquisition date is recognized in the income statement on an accrual basis. Interest earned before the Company acquires is deducted from the original cost at the time of purchase.

Held-to-maturity investments

When there is solid evidence that part or all of the investment may not be recovered and the losses can be reliably determined, the loss is recognized in financial expenses for the year and subtracted directly from the value of the investment.

Loans

Loans are stated at historical cost deductible by provisions for bad debts. Provisions for bad debts for loans are made based on expected losses.

Investments in subsidiaries, joint ventures, associates

Associated company

An associate is a company in which the Company has significant influence but does not have control over financial and operating policies. Significant influence is the power to participate in the financial and operating policy decision-making process of the investee company but does not control these policies.

7 Recognition of account receivables

The receivables of debts are recognized as the recorded amount minus the provisions for doubtful debts.

Receivables are classified as receivables from customers and other receivables according to the following principles:

- Receivables from customers represent commercial receivables arising from buying - selling transactions between the Company and buyers that are independent from the Company, including receivables on the sales proceeds from the export consignment to another unit.
- Other receivables reflect non-commercial receivables not related to purchase and sale transactions.

Provisions for bad debts are made for each bad debt based on the overdue age of debts or expected losses, specifically as follows:

- For overdue receivables:
 - 30% of the value for debts overdue from 6 months to less than 1 year.
 - 50% of the value for debts overdue from 1 year to less than 2 years.
 - 70% of the value for debts overdue from 2 years to less than 3 years.
 - 100% of the value for debts receivable from 3 years or more.
- For receivable debts that are not overdue but difficult to recover: based on expected loss levels to set up provisions.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

8 Inventories

Inventories are recorded at the lower of cost between historical cost and net realizable value.

The historical cost of inventories is determined as follows:

- Raw materials and merchandise: purchase costs and other directly related costs incurred to obtain inventory at the current location and condition.
- Finished product: raw material cost, direct labor cost and related overheads amortized based on normal operating level/freehold rights for land, direct expenses and related cost related to inventory property;
- Work in progress: cost of main materials (or other cost factors as appropriate).

Net realizable value is the estimated selling price of inventories in the normal production or business year minus the estimated costs to complete and the estimated costs required to consume them.

Inventory value is calculated on a weighted average basis and is accounted for by the regular declaration method.

An provision is made for devaluation of inventories for each inventory item whose historical cost is greater than its net realizable value. Increase or decrease in balance of the provision for devaluation of inventories that need to be appropriated at the balance sheet date is recognized at cost of goods sold.

9 Recognition of prepaid expenses

Prepaid expenses record actual expenses that have arisen but are related to the results of business activities in many accounting periods. The Company's prepaid expense includes the following costs:

Boars, sows

Includes costs incurred related to boars, sows and pigs that are qualified for breeding, amortized on a straight-line basis for 3 years from the date the pig is used for breeding.

When the pig dies before the time of allocation, all remaining value will be amortized to cost of goods sold during the period.

Tools and equipments

Tools and instruments put into use are amortized on a straight-line basis over a period of no more than 3 years.

Land rent paid in advance once

The land transfer is recognized as Land Use Right Certificate as land allocation without land use fee under the certificates of land use rights at the Subsidiaries with pig farms. Time of allocation according to the time of land use is approved on the Land Use Right Certificate.

10 Tangible fixed assets

Tangible fixed assets are determined by their historical costs less accumulated depreciation, Historical costs of fixed assets include all the expenses of the Company to have these fixed assets as of the dates they are ready to be put into use, Other expenses incurred subsequent to the initial recognition are included in historical costs of fixed assets only if they certainly bring more economic benefits in the future thanks to the use of these assets, Those which do not meet the above conditions will be recorded into expenses.

When a tangible fixed asset is sold or disposed, its historical cost and accumulated depreciation are written off, then any gain/loss arisen is posted into the income or the expenses during the year.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (*continued*)

10 **Tangible fixed assets (*continued*)**

Fixed assets are depreciated in accordance with the straight-line method over their estimated useful lives. The depreciation years are estimated as follows:

<u>Fixed assets</u>	<u>Years</u>
Land use right	46 – 50
House, building materials	03 – 25
Machinery and equipment	03 – 15
Means of transportation, transmission	05 – 10
Management tools and equipment	03 – 10
Other fixed assets (Pigs)	04

11 **Leased assets**

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset.

A lease is classified as a finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the asset to the lessee. All other leases are classified as operating leases.

Where the Group is the lessee

Assets held under finance leases are capitalised in the consolidated balance sheet at the inception of the lease at the fair value of the leased assets or, if lower, at the net present value of the minimum lease payments. The principal amount included in future lease payments under finance leases are recorded as a liability. The interest amounts included in lease payments are charged to the consolidated income statement over the lease term to achieve a constant rate on interest on the remaining balance of the finance lease liability.

Capitalised financial leased assets are depreciated using straight-line basis over the shorter of the estimated useful life of the asset and the lease term, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term.

Rentals under operating leases are charged to the consolidated income statement on a straight-line basis over the lease term.

12 **Real estate investment**

Real estate investment includes land use rights, houses, a part of a house or infrastructure owned by the Company that is used for the purpose of gaining rental income or awaiting a price increase. Real estate investments are stated at historical costs minus accumulated amortization. Cost of real estate investment is the total cost or fair value of any amount offered for exchange in order to acquire Real estate investment up to the date of purchase or construction;s completion.

Costs related to real estate investment incurred after initial recognition are recognized as expenses, unless these costs are likely to cause the real estate investment to generate more economic benefits in the future than the amount originally calculated then an increase in historical cost is accounted.

When investment property is sold, its historical cost and accumulated depreciation are written off and any gain or loss arisen is posted into the income or the expenses during the year.

When investment property is sold, its historical cost and accumulated depreciation are written off and any gain or loss arisen is accounted in the income or the expenses during the year.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES *(continued)*

12 Real estate investment *(continued)*

Conversion from owner-occupied property or inventory to real estate investment occurs only when the owner terminates the use of the property and commences operating lease to another party or at the end of construction. A transition from real estate investment property to owner-occupied property or inventory occurs only when the owner begins to use the property or begins deployment for sale. Conversion from real estate investment property to owner-occupied property or inventory does not change the historical cost or residual value of immovable property at the date of conversion.

Real estate investment properties held for price increase are not amortized. Where there is solid evidence that real estate investment pending an increase is actually devalued from its market value and that the devaluation is reliably determined, the real estate investment pending an increase will be recorded a deduction in historical cost and the loss is recognized to cost of goods sold.

13 Intangible fixed assets

Intangible fixed assets are recorded as historical cost minus the accumulated depreciation. Historical cost of an intangible asset includes all costs incurred by the Company to acquire the fixed asset up to the time it is ready for use. Expenses related to intangible fixed assets incurred after initial recognition are recorded as production and business costs in the period unless these costs are associated with a specific intangible asset and they increase the economic benefits of these assets.

When an intangible asset is sold or disposed, its historical cost and accumulated depreciation are written off and any gain or loss arisen is posted into the income or the expenses for the year.

The Company's intangible assets include:

Software program

Costs associated with computer software programs that are not an integral part of related hardware are capitalized. Historical cost of computer software is all of the expenses paid by the Company up to the time the software is put into use. Computer software is depreciated on a straight-line basis over 03 - 05 years.

Trademarks, trade names

Historical cost of the trademark is all expenses paid by the Company up to the time the basic brand identity is completed. Trademarks are amortized on a straight-line basis over 03 years.

14 Construction in progress

Construction in progress represents directly related costs (including interest expenses related in accordance with the Company's accounting policy) to assets in construction progress, machinery and equipment being installed for production, rental and management purposes as well as expenses related to the repair of fixed assets in progress. These assets are recorded at cost and not depreciated.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

15 Payables and accrued expenses

Payables and accrued expenses are recognized for future amounts payable in respect of goods and services already received. Accrued expenses are recognized based on reasonable estimates on the payable amount.

Payables are classified as commercial payables, accrued expenses, internal payables and other payables according to the following principles:

- Trade payables represent commercial payables arising from purchases of goods, services or assets and the seller is independent from the Company, including payables when import through authorized receivers.
- Accrued expenses reflect payables for goods or services received from seller or provided to a buyer but not paid due to lack of invoices or insufficient accounting documents and payables to employees on vacation pay, accrued production and business expenses.
- Other payables reflect non-commercial payables not related to the transactions of buying, selling or supplying goods or services.

16 Principle of recognition of loans, convertible bonds and financial lease liabilities

The company must keep track of the payable terms of loans and finance lease liabilities. For loans with a repayment period of more than 12 months from the date of the consolidated financial statements, the accountant must present them as long-term borrowings and financial leases. For loans due within the next 12 months from the date of the financial statements, the accountant must present them as short-term borrowings and financial lease liabilities for a payment plan.

Convertible bonds

Bonds that are convertible by the holder into a fixed number of ordinary shares of the entity are separated into financial liability (a contractual arrangement to deliver cash or another financial asset) and equity instrument (a call option granting the holder the right, for a specified period of time) based on the terms of the contract.

On issuance of the convertible bond, the fair value of the liability component is determined by discounting the future payment (including principal and interest) to present value at the market rate for an equivalent non-convertible bond less issuance cost.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in shareholders' equity. The carrying amount of the conversion option is not re-measured in subsequent years.

Transaction costs are allocated during the lifetime of the bond following straight line basis. At initial recognition, issuance costs are deducted from the liability component of the bond.

Finance lease liabilities

For finance lease liabilities, the total liability reflected to the Credit side of account 341 is the total payable amount calculated by the current value of the minimum lease payments or fair value of the rented assets.

Loans and debts in foreign currencies must be converted into the accounting currency at the actual exchange rate at the time of arising;

- When repaying debts or borrowing in foreign currencies, the Debit side of account 341 is converted at the actual bookkeeping rate for each item;
- When preparing financial statements, loan balances and financial lease liabilities in foreign currencies must be re-evaluated according to actual exchange rates at the time of preparing financial statements.
- Exchange rate differences arising from the settlement and revaluation of loans and financial lease liabilities in foreign currencies at the end of the loan term are recorded as financial income or expenses.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

17 Recognition of owner's equity

Owner's investment capital

Owner's investment capital is recognized according to the amount actually invested by the shareholders.

Other owner's capital

Other capital formed from the addition of business results, revaluation of assets and the residual value between the fair value of assets donated, donated or sponsored after deducting payable taxes (if any) related to these assets.

Undistributed profits

Undistributed profits reflect the results of business after corporate income tax and the situation of profit distribution or loss settlement of the Company.

Dividend

Dividends are recognized as liabilities when declared.

18 Profit distribution

Profit after corporate income tax is distributed to shareholders after appropriation of funds in accordance with the resolution of the General Meeting of Shareholders of the Company and current laws.

Dividends are recognized as liabilities upon approval of the Shareholders' Meeting.

19 Recognition of Revenue

a) Revenue from sales of goods

Revenue of goods sold is recognized when all the following conditions are met:

- Most of the risks and rewards associated with ownership of the product or its goods have been transferred to the buyer.
- The Company no longer holds control over the goods such as the ownership of the goods have been transferred to buyers.
- The revenue can be measured reliably. When the contract provides that the buyer is entitled to return products or goods purchased under specific conditions, the revenue is recognized only when those specific conditions cease to be available and the buyer is not entitled to return products or goods (unless customers have the right to return goods in exchange for other goods or services).
- The Company has received or will receive economic benefits from the sale.
- The costs related to the sale transaction is determined.

b) Revenue from sales of services

Revenue of services sold is recognized when all the following conditions are met:

- The revenue can be measured reliably.
- It is possible to gain economic benefits from the service provision transaction;
- Completed work is determined on the date of making the balance sheet;

It is feasible to determine the costs incurred for the transaction and the cost to complete the transaction of providing that service./.

c) Revenue from financial activities

Revenue arising from interests, royalties, dividends, distributed profits and other revenues from financial activities are recognized when the following two (02) conditions are satisfied simultaneously:

- The revenue can be measured reliably.
- It is possible to gain economic benefits from the service provision transaction;

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

20 **Recognition of Cost of goods sold**

Cost of goods sold in the year was recorded in accordance with the revenue generated in the period and ensured compliance with the prudent principle.

21 **Recognition of financial cost**

Financial costs include loan interest and other costs directly related to loans.

Borrowing costs are recognized into expenses when incurred. Where the borrowing costs are directly related to the investment in construction or production of work in progress, it takes a long enough period (more than 12 months) to be put into use for a predetermined purpose or selling purpose, these borrowing costs are capitalized. For separate loans for the construction of fixed assets, investment properties, interest is capitalized even if the construction period is less than 12 months. Income arising from temporary investment of loans is recorded at a decrease in historical cost of related assets.

22 **Recognition of selling expenses and corporate management costs**

Selling expenses reflect actual costs incurred in the process of selling products, goods or providing services, including costs of offering, introducing products, advertising products, sales commissions, product and goods warranty costs (except construction and installation activities), costs of preservation, packaging, transportation ...

Corporate management costs reflect the general management costs of the enterprise, including the salary costs of the employees of the enterprise management department (salaries, wages, allowances, ...); social insurance, health insurance, trade union funding, unemployment insurance of the enterprise manager; expenses for office materials, labor tools, depreciation of fixed assets for enterprise management; land rental, license tax; the provision for bad debts; outside services (electricity, water, telephone, fax, property insurance, fire ...); other monetary expenses (reception, customer conference ...).

23 **Tax**

Current corporate income tax

The current CIT expense is determined on the basis of taxable income. Taxable income is different from accounting profit due to adjustments of temporary differences between tax and accounting, non-deductible expenses as well as adjustments of non-taxable income and transferred losses.

Current income tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the current income tax is also dealt with in equity.

Current income tax assets and liabilities are offset when there is a legally enforceable right for the Group to set off current tax assets against current tax liabilities and when the Group intends to settle its current tax assets and liabilities on a net basis.

Deferred corporate income tax

Deferred tax is provided using the liability method on temporary differences at the consolidated balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- ▶ where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the related transaction affects neither the accounting profit nor taxable profit or loss; and
- ▶ in respect of taxable temporarily differences associated with investments in subsidiaries and associates, and interests in joint ventures where timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

BAF VIETNAM AGRICULTURE JOINT STOCK COMPANY

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 4th QUARTER
as at and for the year ended 31 December 2025

III. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (*continued*)

23 Tax (*continued*)

Deferred corporate income tax (continued)

Deferred tax assets are recognised for all deductible temporary differences, carried forward unused tax credit and unused tax losses, to the extent that it is probable that taxable profit will be available against which deductible temporary differences, carried forward unused tax credit and unused tax losses can be utilised, except:

- ▶ where the deferred tax asset in respect of deductible temporary difference which arises from the initial recognition of an asset or liability which at the time of the related transaction, affects neither the accounting profit nor taxable profit or loss; and
- ▶ in respect of deductible temporarily differences associated with investments in subsidiaries, associates, and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Previously unrecognised deferred tax assets are re-assessed at each balance sheet date and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled based on tax rates and tax laws that have been enacted at the balance sheet date.

Deferred tax is charged or credited to the consolidated income statement, except when it relates to items recognised directly to equity, in which case the deferred tax is also dealt with in the equity account.

Deferred tax assets and liabilities are offset when there is a legally enforceable right for the Group to off-set current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on:

- ▶ either the same taxable entity; or
- ▶ when the Group intends either settle current tax liabilities and assets on a net basis or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

24 Related parties

Parties are considered a related party of the Company if one party has the ability to control the other party or otherwise significantly influence the other party in making financial decisions and operate, or when the Company and the other party jointly or severally control.

In considering related parties relationship, the nature of relationship is focused more than the legal form.

Transactions with related parties during the period are presented in Note V.10.

Re: Explanation of the difference in profit
after tax on the consolidated financial
statements for Quarter IV/2025 compared
to the same period in 2024

Ho Chi Minh City, 30 January 2026

To: - State Securities Commission
- Ho Chi Minh City Stock Exchange
- Hanoi Stock Exchange

BAF Vietnam Agriculture Joint Stock Company would like to provide an explanation regarding the difference in Profit After Tax in the Consolidated Financial Statements for QIV 2025 compared to the same period in 2024 as follows:

In the Consolidated Financial Statements for Q4 2025 of the Company:

Indicator	2025 (VND)	2024 (VND)	Increase (Decrease) Difference	
			(VND)	%
Pre-tax Profit Quarter IV	(277,798,384,553)	118,641,394,230	(396,439,778,783)	-61%
Accumulated Net Pre-tax Profit for 12 Months	101,923,057,760	406,249,012,223	(304,325,954,463)	38%
Profit After Tax Quarter IV	(264,893,801,197)	109,248,624,713	(374,142,425,910)	-63%
Accumulated Net Profit After Tax for 12 Months	100,446,618,025	318,936,314,048	(218,489,696,023)	70%

Net profit after tax for FY2025 and Q4/2025 declined year-on-year compared to 2024 due to the following key factors:

1. Positive developments

- In Q4/2025, BAF continued to expand its operating scale, with several new farms coming into operation. Sales volume maintained a strong upward trend, bringing total full-year output to more than 782,000 heads, equivalent to 140% of the 557,000 heads recorded in the previous year. Accordingly, revenue from the livestock segment reached a historical high of over VND 1,400 billion, providing a solid foundation for BAF to further optimize profit margins in the coming years.
- The fresh meat and processed meat segments continued to increase their contribution to total revenue, reflecting the Company's strategic shift toward downstream, higher value-added products. The expansion and optimization of the integrated value chain—from breeding, feed production, and farming to slaughtering, processing, and distribution—have enabled BAF to gradually reduce its dependence on fluctuations in live hog prices, thereby stabilizing gross margins and mitigating cyclical risks.
- Although business performance in Q4/2025 faced significant pressure, December 2025 recorded a return to positive profitability, supported by a recovery in live hog prices from the trough observed in October–November 2025, as well as improved cost control in

- farming operations. This development suggests that margins have likely bottomed out and entered a recovery phase, creating a positive premise for business results in subsequent quarters as hog prices and seasonal demand during the Lunar New Year continue to improve.

2. Key factors behind the weaker-than-expected Q4 results

- Live hog prices declined sharply during October–November 2025, falling to a trough of approximately VND 45,000–46,000/kg, due to the combined impact of disease outbreaks (ASF) and widespread adverse weather conditions. This significantly compressed gross profit margins.
- Production costs increased markedly in Q4, including expenses related to disease prevention, environmental treatment, and additional operating costs arising from unfavorable weather conditions. As a result, average production costs rose while selling prices declined.
- The commissioning of multiple new farms throughout 2025 led to a rapid increase in fixed costs (labor, utilities, depreciation, and initial operating expenses), while operational efficiency had not yet reached optimal levels during the early stages. Consequently, gross margins did not fully reflect the system's long-term potential, and short-term pressure was exerted on cash flows and financial indicators in Q4/2025. However, as output ramps up and operations stabilize in 2026, unit costs are expected to decline significantly, thereby supporting margin and profit improvement.

Above is the additional explanation from BAF Vietnam Agriculture Joint Stock Company.

Thank you sincerely./.
